- All of the Profile Screen
 - Pull user information from Firestore
- All of the Edit Profile Screen
 - Update user information to Firestore
- Chat screen and real-time messaging
 - Updating and listening for Firestore chat updates

Deviations

- Started on notifications ahead of schedule

- Integrating a camera feature into our app for profile pictures proved to be more difficult than anticipated due to difficulty uploading pictures into Firebase Storage. We will finish this by the final release.
- Calendar currently does not highlight days with birthdays because of issues with the appearance rendering. This will be implemented by the final release.
